Tristan Mountanos Tasks Per Day

A scatter plot showing 1000 random numbers. The y-axis ranges from 0 to 10. A horizontal dashed red line is drawn at y = 6.1, labeled "Average 6.1". A specific data point is highlighted with a yellow diamond and labeled "Tristan Mountanos 2.13". The data points are distributed across the plot, with a higher density near the average line.

A scatter plot showing 1000 random numbers. The y-axis ranges from 0 to 10. A horizontal dashed red line is drawn at y = 6.1, labeled "Average 6.1". A specific data point is highlighted with a yellow diamond and labeled "Tristan Mountanos 2.13". The data points are distributed across the plot, with a higher density near the average line.

A scatter plot showing the distribution of 1000 simulated values of the difference between the maximum and minimum of 1000 iid standard normal variables. The x-axis represents the difference value, and the y-axis represents the frequency of occurrences. The data points are black dots. A horizontal dashed red line is drawn at the average value of 6.1, labeled 'Average 6.1'. A horizontal solid black line is drawn at the value 2.13, labeled 'Tristan Mountanos 2.13'. A yellow diamond marker is placed at the 2.13 value on the x-axis, indicating the specific value of interest.
